MARKETING SUITES

Media and refreshments unit

At City & County, we fully understand the unique role your marketing suite plays within the customer journey, starting with the welcoming atmosphere it needs to create on arrival. For most visitors, this will be their first impression of build quality and craftsmanship, so it is crucial to demonstrate that all important wow-factor which will set your marketing suite apart from all of your competitors.

Whether you require a portable cabin, double garage, retail space, or bespoke multi story modular building, our team of in-house experts with over 20 years experience, can help you every step of the way.

Allow us to take the hassle out of the entire process with your very own dedicated project manager, who will take ownership of all aspects including brief, design, electrical plans, survey, scheduling, pricing, manufacturing and installation to ensure your suite exceeds your expectations, and is delivered within budget and on time... each and every time.

LET US GUIDE YOU THROUGH THE PROCESS,
FROM START - TO - FINISH

Step 1
Briefing meeting

Step 2
Site surveys completed at
each build stage

Step 3
Concepts designed

Step 4

TOUCH SCREEN TECHNOLOGY

WHY USE TOUCH SCREEN TECHNOLOGY?

Stand out from your competitors and showcase your development your development like no other.

Digital touchscreens allow your development to be seen by potential customers twenty four / seven, by using the latest high impact, ultra bright cutting edge touch screen technology.

Internal and external screens can display all of the information you desire including availability, site plans, property image libraries, detailed floor plans, walk through interactive videos, local area details and precise property locations.

Customers can also register their details and request an appointment at any time of day or night.

ALLOWING YOU TO BE OPEN FOR BUSINESS 24/7, DAY & NIGHT

- Display your entire development externally for your customers to view even when you're closed
- Be open for business 24/7
- Internal models allow your customers to browse at their leisure
- Valuable customer data collected and stored in weekly reports
- Software designed specifically for your site and brand
- Showcase all properties using multiple images, floor plans, walk throughs and location maps
- All pricing and availability details are automatically updated ensuring your portfolio is always current
- The high impact screen and crisp colourful images will enhance your interior display

WE GO WHERE YOU ARE - NATIONWIDE

HEALTH & SAFETY

There are some things we just don't compromise on.

When it comes to Health & Safety at City & County Graphics, we simply don't compromise – whether that's of our staff, of our clients and your contractors, of your customers or of the general public. The size and style of the signs we manufacture, the high quality materials we use and the often high-traffic locations in which we install them, could create the possibility of causing injury if they were not installed to the highest possible standards – and set to withstand additional strains of high winds or adverse weather conditions. We take every precaution available to us and we will not take a project on if asked to take shortcuts – we are not just protecting the public, but your brand and reputation as well as ours.

We use structural engineers to calculate wind loadings, ground conditions, and the suitability of materials being suggested, fixings etc. Their reports give us the necessary peace of mind during both manufacture and installation.

We back this up by sending one of our management team to check that the engineers' reports are being followed on-site; we record the findings and hold regular 'tool box talks' with all staff to

keep information flowing. Health & Safety also means keeping our staff trained and up to date with the latest regulations and recommendations, site instructions and client expectations. To this end, all of our site staff have CSCS cards, some at supervisory level, some at temporary works supervisory level and certificates are held for mobile elevated work platforms, tower scaffolds, cat scanners, NRSWA, SMAS etc.

A zero-tolerance to risk

We will, and sometimes do, turn work away from clients who are not prepared to take Health & Safety as seriously as we do. Sometimes there are cost implications when, for example, a structural engineer insists on larger posts, or more posts, or additional fixings and some clients occasionally cannot see the benefit of those additional safety features. Unfortunately the failure to acknowledge those benefits is sometimes only seen when it is too late...

Working with City & County, you can be assured that your installation complies – every time.

HIGHSITE

AERIAL SURVEY SERVICE

Barton Park, Oxford
Development progress image

Watch how your sites grow and develop with our unique aerial survey service

Incorporating high quality video and photographs HighSite flights are ideal for managers and directors who can't always get to site but want to review construction progress remotely, from anywhere in the world!

HighSite flights are also ideal for comparing visual records for each site, tracking build quality, plant and equipment and potential Health & Safety issues. HighSite video and photos also provide a unique angle for marketing and sales material.

- 1** Set a pre-determined flight plan that can be repeated again and again
- 2** View footage from your sites anywhere using a standard web browser
- 3** Watch as your site evolves, in ultra-sharp detail
- 4** Compile a visual inventory of potential Health & Safety issues
- before or after they happen!
- 5** Create time-lapse video/stills - perfect for marketing campaigns
- 6** Arrange flights as often as you want
